

## ENERGY ROW

Energy Row is an outdoor vendor area established in 2009 which is devoted to showing different sources of energy and energy efficiency products. The area has been well received by our thousands of fairgoers and the participating vendors are pleased with the interest shown in their products. The vendor spaces are 20 feet deep with frontage available at \$20 a front foot (minimum 10 feet) and are located off a paved walkway with electricity and water available at no extra charge.

The Fryeburg Fair attracts upwards of 300,000 visitors each year and has a built in audience from the over 3,000 RV campsites, that are filled for the annual event.

If you would like to apply for vendor space, send a letter outlining your product and the amount of frontage needed and include a list of events or shows at which you have displayed. Please include pamphlets of your products, along with photos you may have of your booth or display from other events and shows, along with the name of the contact person, your email address and web site if available, and your mailing address.

Send your application to: Fryeburg Fair, Attn: Energy Row, PO Box 78, Fryeburg, ME 04037-0078

We will accept applications anytime after October 20, 2011. We will review applications during the winter and spring and will begin to fill available spaces sometime during the late spring.

**NOTE: We do not hold applications from year to year and no vendor space is “grandfathered”, therefore, it is necessary for all vendors to reapply each year. Only items that are listed in your application or contract can be sold. Any additional items must have the approval of the Superintendent prior to the Fair.**
